

01 Preface

Acme Specialty Chemicals Pvt. Ltd. is committed to environmental stewardship across every facility, process and product. As a manufacturer of specialty intermediates, we recognize our responsibility to minimize ecological impact, conserve natural resources and operate in line with internationally recognized environmental standards. This Environmental Policy establishes the framework through which we set objectives, allocate resources and measure progress toward a more sustainable future.

02 Policy Declaration

Acme Specialty Chemicals affirms its unwavering commitment to protecting the environment, preventing pollution, and continually improving its environmental performance. The Company will comply with all applicable legal requirements, reduce its carbon and water intensity, manage waste responsibly, and integrate environmental considerations into every business decision.

03 Scope

This Environmental Policy applies to all operations, sites and activities of Acme Specialty Chemicals Pvt. Ltd., including manufacturing, R&D, warehousing, logistics, and corporate functions. It covers all employees, contractors, suppliers and visitors acting on behalf of the Company.

Location / Unit	Address	Primary Function
Manesar Plant	Plot 14, Sector 4, IMT Manesar, Gurugram - 122051, Haryana, India	Manufacturing & R&D

04 Key Focus Areas

01 Energy Consumption & GHG Emissions

02 Air Emissions Control

03 Raw Materials & Resource Efficiency

04 Waste Management & Circularity

05 Water Stewardship

06 Biodiversity & Land Use

07 Climate Risk & Emergency Preparedness

08 Product End-of-Life & Environmental Stewardship

05 Qualitative Objectives

01 Energy Consumption & GHG Emissions

- Improve energy efficiency across all manufacturing operations and reduce absolute Scope 1 and Scope 2 GHG emissions year-on-year.
 - Increase the share of renewable electricity in our total energy mix and procure credible renewable energy certificates where feasible.
 - Maintain an energy management system aligned with ISO 50001 and disclose progress in our annual sustainability report.
-

02 Air Emissions Control

- Operate and maintain air pollution control equipment to keep all stack emissions well below regulatory limits.
- Monitor fugitive emissions through periodic Leak Detection and Repair (LDAR) programs.
- Progressively replace high-global-warming-potential process gases with low-GWP alternatives.

03 Raw Materials & Resource Efficiency

- Optimize raw material use, increase process yields and reduce process losses through continuous improvement.
- Prefer bio-based, recycled and sustainably sourced inputs where technically and commercially viable.
- Collaborate with R&D and procurement to design products with reduced environmental footprint.

04 Waste Management & Circularity

- Apply the waste hierarchy - prevent, reduce, reuse, recycle, recover, dispose - across all operations.
- Achieve diversion of operational waste from landfill through segregation, recycling and co-processing.
- Engage with licensed third-party waste processors and maintain auditable manifests for all hazardous waste streams.

05 Water Stewardship

- Reduce freshwater withdrawal per unit of production and recycle treated wastewater in suitable applications.
- Maintain zero-liquid-discharge compliant treatment systems and conduct periodic third-party water-quality audits.
- Conduct site-level water risk assessments using tools such as WRI Aqueduct and respond to high-risk findings.

06 Biodiversity & Land Use

- Avoid operating in or near ecologically sensitive areas and conduct biodiversity impact assessments for new projects.
- Implement landscaping and habitat programs on owned land to support local flora and fauna.
- Engage with local communities and conservation groups on biodiversity stewardship initiatives.

07 Climate Risk & Emergency Preparedness

- Identify, assess and mitigate climate-related physical and transition risks as part of enterprise risk management.
- Maintain site-level emergency response plans for spills, releases and natural events, and conduct regular drills.
- Disclose climate-related risks and opportunities aligned with TCFD recommendations.

o8 Product End-of-Life & Environmental Stewardship

- Apply life-cycle thinking to product design and provide customers with end-of-life and disposal guidance.
- Extend producer responsibility by participating in take-back and recycling programs where applicable.
- Continuously improve packaging to reduce material use and increase recycled content.

o6 Quantitative Targets

o1 Energy Consumption & GHG Emissions

Reduce specific energy consumption (kWh per tonne of product) by 15%

Baseline FY 2022-23 · Due FY 2029-30

o2 Energy Consumption & GHG Emissions

Reduce absolute Scope 1 + Scope 2 GHG emissions by 30%

Baseline FY 2022-23 · Due FY 2030-31

o3 Energy Consumption & GHG Emissions

Source 50% of electricity from renewables

Baseline FY 2024-25 · Due FY 2028-29

o4 Water Stewardship

Reduce specific freshwater withdrawal by 25%

Baseline FY 2022-23 · Due FY 2029-30

o5 Water Stewardship

Recycle / reuse 70% of process wastewater

Baseline FY 2022-23 · Due FY 2028-29

o6 Waste Management & Circularity

Achieve 95% diversion of operational waste from landfill

Baseline FY 2022-23 · Due FY 2028-29

o7 Waste Management & Circularity

Reduce hazardous waste generation per unit by 20%

Baseline FY 2022-23 · Due FY 2029-30

o8 Air Emissions Control

Maintain zero exceedance of statutory air emission limits

Baseline FY 2022-23 · Due FY 2027-28

- 09 **Air Emissions Control**
- Replace 100% of high-GWP refrigerants with low-GWP alternatives

Baseline FY 2024-25 · Due FY 2028-29

07 **SDG Alignment**

SDG 6	Clean Water
SDG 7	Clean Energy
SDG 12	Responsible Consumption
SDG 13	Climate Action
SDG 14	Life Below Water
SDG 15	Life on Land
SDG 17	Partnerships

08 **Roles & Responsibilities**

01 Board & Senior Management	02 EHS / Sustainability Team
Provide strategic direction, approve the policy, allocate resources, and review environmental performance at the highest level.	Maintain the environmental management system, ensure regulatory compliance, track KPIs, coordinate audits, and report progress to leadership.
03 Production & Operations	04 Procurement & Supply Chain
Implement energy, water and waste management initiatives on the shop floor, maintain pollution control equipment, and minimize process losses.	Engage suppliers on sustainability criteria, source environmentally responsible materials, and integrate ESG clauses into contracts.

05	All Employees Follow environmental procedures, identify improvement opportunities, participate in training, and report incidents or concerns.	06	Contractors & Visitors Comply with site environmental rules, follow safe handling and waste segregation practices, and report any observed non-conformities.
----	---	----	--

09	Monitoring, Reporting & Transparency
Environmental performance is monitored continuously through a centralized EHS dashboard, with KPIs reviewed monthly by site leadership and quarterly by the Executive Committee. Independent third-party audits are conducted annually for ISO 14001 and as required by customers. Findings, progress against targets, and incidents are reported in the annual Sustainability Report prepared in line with GRI Standards and BRSR.	

10	Review Mechanism & Continuous Improvement
This Policy is reviewed every two years or earlier if there are significant changes in operations, regulations, or stakeholder expectations. The EHS team initiates the review, the Executive Committee approves revisions, and updated versions are communicated to all employees and relevant stakeholders. Feedback collected through employee engagement, customer audits and investor dialogues is incorporated into each revision.	

Effective 2025-01-15	Approved by Managing Director	Revision 01	Acme Specialty Chemicals Pvt. Ltd.
